A screenshot of the "Medicio" app interface. The app has a green and blue bokeh background. At the top, the word "Medicio" is displayed in a stylized font. Below it, there are three buttons: "New Entry", "Search", and "View all Entry".

Edit button

When clicking on Edit button, it opens a new page.

The screenshot shows a web browser window with the address bar displaying `localhost/Xampp1/Year2S2/webService/interface/update.php?filecode=A0001`. The page content is a patient profile form titled "Patient" with a sub-header "1 Your Personal Info". It includes a "Photo" section with a woman's image and a "Choose File" button. Below this are input fields for "File code" (containing "A0001"), "First Name" (containing "Sergi"), "Last Name" (containing "Penny"), and "Date of Birth" (containing "07/19/1995").

The file code is not editable.

A close-up of the "File code" input field, which is disabled and contains the value "A0001".

```
<input name="filecode" id="filecode" value="php echo $filecode; ?"  
class="form-control" readOnly="true" type="text" required>
```

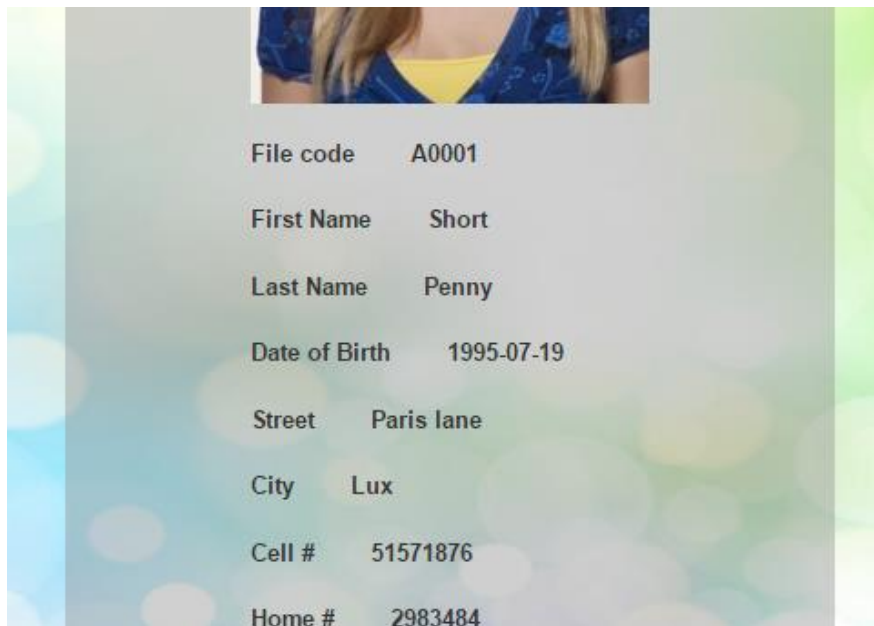

Assume we have to change the surname of Penny.

A close-up of the "First Name" input field, which is active and contains the value "Short". Below it are two buttons: a green "Save" button and a blue "Cancel" button.

Alert showing the answer is saved in xml.

A screenshot of a JavaScript alert box with the text "localhost says: Saved" and an "OK" button.
